Electronic Information Resources (Internet)

The Ledyard school district strongly believes in the educational value of electronic services and recognizes its potential to support curriculum and student learning by facilitating resource sharing, innovation and communication. The district will make every reasonable effort to protect students and teachers from any misuses or abuses as a result of their experiences with the Internet and its information services.

The Board of Education believes this educational opportunity also demands personal responsibility and an understanding of the acceptable use policy for the Internet by students, parents, and staff. Violations of this policy by a student may result in disciplinary action, up to and including suspension and/or expulsion. In the case of any breach of this policy by an employee, such disciplinary action may include discharge.

It must be recognized that while the district has established acceptable use policies, there may be unacceptable material or communications that students can access due to the inability to control materials available through the Internet. The Ledyard school system does not condone access or use of such materials.

The Superintendent shall develop and promulgate an acceptable use regulation pertaining to the Internet.

Policy adopted: November 20, 1996
Policy revised: August 16, 2000
