

Instruction

Student Performances and Exhibitions

The Board of Education recognizes the value of student performances and exhibitions as an important part of the educational program. The primary focus of such activities should be on the educational value to the students participating, and secondarily upon the entertainment value to the audience.

Staff sponsors of student performances and exhibitions shall ensure that the material presented to the public is compatible with the goals of the school district.

Preparation, rehearsals, and performances shall be planned to limit the negative effects on the rest of the educational program.

(cf. 5145.2 - Freedom of Speech/Expression)
