

Suicide Prevention/Intervention

Students

Regulations

When a Ledyard school staff member is confronted with a situation in which a student makes a statement of suicidal thinking, or it appears that an attempt at suicide is possible, the following actions will take place:

1. The staff member immediately will refer the student to the appropriate guidance counselor, or in the absence of such a counselor, the building principal or his/her designee.
2. In the event the staff member perceives that a student has taken action which creates a medical emergency, the school nurse will also be notified immediately and emergency medical procedures will be followed.
3. The counselor will notify the principal and the school nurse and seek the intervention of the school psychologist.
4. The counselor and/or school psychologist will meet with the student immediately for the purpose of establishing sequential facts or events leading to the crisis. At no time during this process is the student to be left alone.
5. If the student is not found to be suicidal, the parents or guardian will be notified of the referral and of all conclusions reached. The Summary Suicide Report will be completed and distributed to the parent/guardian, the principal, and Director of Special Services.
6. If the student is found to be suicidal, immediate contact will be made with a parent or guardian and a conference will be held the same day.
 - A. During the conference, the parent or guardian will be advised that an immediate psychiatric evaluation is needed.
 - B. Under no circumstances is a student allowed to go home alone. The student must be released only to a parent, guardian, or other responsible adult.
 - C. If reasonable attempts to reach the parent, guardian, or other responsible adult in whose custody the student may be released are not successful, the case will be treated as a medical emergency and arrangements will be made to transport the student to an area hospital emergency room or mental health facility.
 - D. If the student requires medical attention, he/she will be transported immediately to an area hospital. The school nurse will arrange to have the parents or guardian meet the student at the hospital.
 - E. A detailed report will be written within 24 hours by the staff member who is assigned responsibility for the case. The report shall include:
 1. Name of the student;
 2. Name of the staff member(s) involved;
 3. Reasons for the referral;
 4. Time and date of all conferences;
 5. Summary of all conferences; and
 6. Recommendations made to parents or guardian, student and building staff.
 - F. A copy of all reports will be submitted to the parents or guardian, the principal, and the Director of Special Services.
 - G. Follow-up contact will be in accordance with the recommendations developed at the conference. A report will also be written by the staff member who is

assigned responsibility for the case indicating those activities performed to follow through and ensure the safety and well-being of the student.

- H. Failure on the part of the family to take seriously and provide for the safety of the student in case of potential suicide will be considered emotional neglect and reported to the Department of Children and Families.
- I. If as a result of suicidal activity a need exists for changes in the student's program, the school's planning and placement team will convene and consult with the student's mental health professional, the parent(s) or guardian appropriate outside facility staff members and, if feasible, the student to plan the student's educational program.
- J. The school professional who is assigned responsibility for the case will maintain contact with the student's mental health professionals to support programming needs and follow-up procedures.

7. If a staff member becomes aware of or has reasonable cause to suspect an out-of-school suicide attempt, he or she shall notify the principal. The principal shall notify the parents or guardian and offer the assistance of the crisis intervention team.
