

Internet Acceptable Use: Filtering

The Board of Education provides computers, computer systems, software, electronic access privileges, and networks for students and staff to carry out the mission of the Board in an environment, which ensures access to up-to-date information, management, and communication services. Responsible use of these systems and networks is required of all students and staff.

The computers, computer systems, software, electronic access privileges, and networks are the property of the Board of Education and are to be used only for those activities directly related to teaching, learning, and/or management by students and staff. The equipment, infrastructure, and software are not to be used for personal gain by any student or staff member.

In order to ensure that the District's Internet connection is used in the appropriate manner and that all users are protected from any inappropriate information published on the Internet, the District has and is continuing to implement the following:

1. Professional development opportunities to help teachers integrate the use of the Internet into classroom teaching.
2. Use of the computers, computer systems, software electronic access privileges and networks shall be restricted to those users who have signed the District's "Acceptable Use Policy." In the case of minors, the "Acceptable Use Policy" must also be signed by the student's parent or guardian.
3. Implementation of a system developed to filter Internet sites with content considered unacceptable for student viewing.

Filtering is only one technique used to manage student access to the Internet and encourage acceptable usage. It is not a foolproof approach to preventing access to inappropriate material. Filtering should be used in conjunction with:

- Educating students
- Using recognized Internet gateways as a searching tool and/or homepage for students, in order to facilitate access to appropriate material;
- Using "Acceptable Use Agreements;"
- Using behavior management practices for which Internet access privileges can be earned or lost; and
- Appropriate supervision, either in person and/or electronically.

The placement of filters on District computers/computer systems is an exercise of the Board's ability to determine educational suitability of all material used in the schools.

Filters are utilized with District schools to (1) block pre-selected sites, (2) block by word, (3) block entire categories like chat and newsgroups, (4) through a pre-selected list of approved sites and (5) other areas as deemed necessary.

The Superintendent of Schools is directed to establish guidelines and procedures for responsible use of computers, computer systems, software, electronic access privileges, and networks provided by the Board of Education.

Federal E-Rate program:

The District recognizes its responsibility to educate students regarding appropriate behavior on social networking and chat room sites about cyberbullying. Therefore, students shall be provided instruction about appropriate online behavior, including interacting with other individuals on social networking sites and in chat rooms and cyberbullying awareness and response.
